Besides these situations, they also experience the following shortcomings:
Given this scenario, we must act because addressing the welfare of children and young people is an emergency.

As health professionals, I invite you to reflect on the following questions:

1. ¿Are children and young people responsible for their welfare?

2. ¿Are they victims or protagonists of this anemic world in transcendent values?

3. ¿What can be expected in the future of children and young people who are developing in such poorly situations?

4. ¿As a nurse member of the health team, what can I do on behalf of children and youth?
I SHOW THEM POSSIBLE SOLUTIONS AS CONCLUSIONS:

* Children must be universally recognized as a human being

* If we want children and young people become proactive adults
*Every professional nursery can and must contribute to this population.....

*We go beyond leaving a better legacy for children and young people
BECAUSE CHILDREN AND YOUNG PEOPLE ARE PRESENT, FUTURE, AND OUR RESPONSIBILITY
